Contents of Volume 39 (1999)

Barradas I, Tassier K: Reducing competition vs. improving resistance to disturbances in the environment 518
Boer MP, Kooi BW, Kooijman SALM: Homoclinic and heteroclinic orbits to a cycle in a tri-trophic food chain 19
Boukal DS, Křivan V: Lyapunov functions for Lotka–Volterra predator–prey models with optimal foraging behavior 493
Brindley J → Clother DR
Brooks B → Yi T
Byrne HM: A weakly nonlinear analysis of a model of avascular solid tumour growth 59

Clancy D: Optimal intervention for epidemic models with general infection and removal rate functions 309
Clother DR, Brindley J: Excitability of an age-structured plankton ecosystem 377
Cohen DS → Edwards DA
Cooke K, van den Driessche P, Zou X: Interaction of maturation delay and nonlinear birth in population and epidemic models 332
Cressman R → Yi T

Edwards DA, Goldstein B, Cohen DS: Transport effects on surface–volume biological reactions 533
Epstein M, Johnston C: Improved solution for solitary waves in arteries 1

Goldstein B → Edwards DA

Henson SM: A continuous, age-structured insect population model 217

Jackson TL, Lubkin SR, Murray JD: Theoretical analysis of conjugate localization in two-step cancer chemotherapy 353
Johnston C → Epstein M
Joyce P: No BLUE among phylogenetic estimators 421

King AA, Schaffer WM: The rainbow bridge: Hamiltonian limits and resonance in predator-prey dynamics 439
Kooi BW → Boer MP
Kooijman SALM → Boer MP
Křivan V → Boukal DS

Lu Z, Wang W: Permanence and global attractivity for Lotka–Volterra difference systems 269
Lubkin SR → Jackson TL

Mesterton-Gibbons M: On sperm competition games: raffles and roles revisited 91
Milner FA, Pugliese A: Periodic solutions: a robust numerical method for an S-I-R model of epidemics 471
Mukhopadhyay A → Tapaswi PK
Mukhopadhyay K → Wiegmann DD
Murray JD → Jackson TL

Othmer HG, Xie M: Subharmonic resonance and chaos in forced excitable systems 139

Percus JK → Percus OE
Percus OE, Percus JK: Island length distribution in genome sequencing 244
Pugliese A → Milner FA

Real LA → Wiegmann DD
Regalado CM, Sleeman BD: Aggregation and collapse in a mechanical model of fungal tip growth 109
Rowlands G → Yannacopoulos AN

Schaffer WM → King AA
Sleeman BD → Regalado CM

Tapaswi PK, Mukhopadhyay A: Effects of environmental fluctuation on plankton allelopathy 39
Tassier K → Barradas I

van den Driessche P → Cooke K

Wang W → Lu Z
Wiegmann DD, Mukhopadhyay K, Real LA: Sequential search and the influence of male quality on female mating decisions 193

Xie M → Othmer HG

Yannacopoulos AN, Rowlands G: Effective drift velocities and effective diffusivities of swimming microorganisms in external flows 172
Yi T, Cressman R, Brooks B: Nonlinear frequency-dependent selection at a single locus with two alleles and two phenotypes 283

Zou X → Cooke K
